*ICSI, a direct hit in equine reproductive medicine.
Today's success formula in modern horse breeding.*

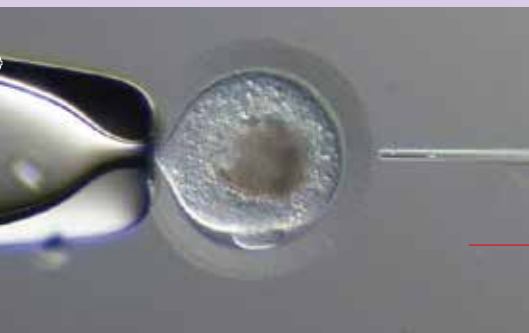

A EUROPEAN LEADER IN EQUINE ASSISTED REPRODUCTION

In collaboration with Avantea, a world-renowned laboratory in Italy, **ICSISTRAWS** offers breeders access to state-of-art ICSI technology through our selected partner stations.

With **more than 30 years of experience**, Avantea is a reference point for breeders, owners, and veterinarians who aim to maximize the genetic potential of their horses.

*Advanced science to create
future champions.*

ADVANCED GENETIC SERVICES FOR BETTER BREEDING DECISIONS

EMBRYO SEXING

Identify the sex of your future foal before embryo transfer.

GENETIC SCREENING

Screen for inherited diseases and genetic mutations relevant to your breeding programme.

COAT COLOUR ANALYSIS

By analysing the key genes responsible for coat colour and patterns, we can predict the coat colour of your future foal.

ICSI, 10 key **BENEFITS** for your breeding programme

01

TOP GENETICS

Access the most exclusive bloodlines in the world, including stallions with exceptional semen quality.

02

NEW OPPORTUNITIES

Older mares and mares with fertility problems can also benefit from ICSI, giving them a valuable second chance.

03

MAXIMUM FLEXIBILITY

ICSI can be performed throughout the year, independently of the traditional breeding season.

04

UNIQUE BLOODLINES

Create extraordinary genetic combinations, even when a stallion has limited semen availability or fertility.

05

GREATER CHOICE

Combine embryos from an OPU session with semen from two or three different stallions.

06

MORE EMBRYOS

A single OPU session can produce multiple embryos in one cycle.

07

TIME MANAGEMENT

Plan embryo production and transfer at the ideal time for your breeding and competition schedule.

08

SEX DETERMINATION

Gain greater control over your breeding programme by determining the sex of the embryo.

09

EXCLUSIVE COMBINATIONS

Create your dream combinations, preserve unique mare lines and invest in the genetic future of your breeding programme.

10

ADVANCED TECHNOLOGY

A proven technique originating in human medicine, now successfully applied in modern equine breeding.
